YES OR NO

We know what O'Malley and the 2011 Legislature did. We know that some of the Legislators who are still in office didn't understand the devastating consequences that would result from their vote and we know some just didn't care. We know that these retirees will become bankrupt trying to find the money to pay for medications that will keep them alive. We know that there is an election coming up. We know that these retirees are motivated to turn this election on its ear. What we don't know is whether you support our cause to reverse this terrible injustice. Just a Yes or No is needed.

Your answer will be shared with the thousands on Facebook who have coalesced around this issue. Don't think that a non-response will help. It won't. It will be considered a No and we as a group will react accordingly and do everything in our power to ensure that you will not have the power ever again.

Just Yes or No.

"For, in the final analysis, our most basic common link is that we all inhabit this small planet. We all breathe the same air. We all cherish our children's future. And we are all mortal."

President John F. Kennedy.

Commencement Address at American University, Washington, D.C., June 10, 1963
